

Women's Health Care is the only all-women ob-gyn physician group practicing at Sharp Mary Birch Hospital. This is an advantage, since when it comes to the most personal of medical visits, many women prefer doctors who understand their experiences. Each physician in this group offers a sympathetic female perspective and expertise in her field.

Dr. Bhoomi Brahmbhatt, Dr. Dana Huskey, Dr. Colleen McNally and Dr. Rovena Reagan have all received excellent training at prestigious university medical centers throughout the country and provide patients throughout the country and provide patients with the latest and most technologically advanced treatment options. The physicians are dedicated to providing their patients with the most innovative technology available, including diagnostic modalities, contraception, urogynecology, menopause and minimally invasive surgery.

Women's Health Care

The doctors recognize their patients' need for comprehensive gynecology care throughout a woman's life. This group is also unique in providing pediatric gynecology from infancy through adolescence.

The doctors are widely known for their distinguished reputations, evident by the fact that other physicians and their families trust their care to them. With staff fluent in English, Spanish, Korean, Hindi and Gujarati, the dynamic team at Women's Health Care provides care to a wide spectrum of women.

Staying at the forefront of medical advances is clearly a priority for them. They have a research department and participate in multiple clinical trials in areas such as menopause, fibroids, over-active bladder, and new pap technology. This critical research gives them unmatched knowledge about the latest medical treatments. "Participating patients can contribute to future therapy, receive the latest treatment at no cost and are compensated for time and travel," says Dr. Reagan, research director.

The compassion and dedication of each doctor is clear by their willingness to accommodate every patient. "If a patient has an urgent need and requests an appointment, we will find a way to see them," says Dr. McNally, named a Top Doctor by *San Diego Magazine*.
